- Plan the optimal inventory mix for each dispensing station

Distribute any mix of garments—by size or by personalized items or sets—to meet all specific staff requirements.

- Customize to suit your facilities scrub needs and capacity

- Monitor inventory levels

Track scrubs throughout their usage cycle using RFID tagging technology.

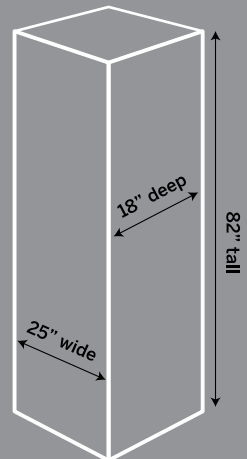

- Data driven insights

Monitor inventory in dispensers, distribution rooms, and stock rooms, plan and optimize the inventory mix, scan items to various locations and users, and generate reports.
